

2025 Mill & Overlay Program Update #7 – 6/20/25 Last Update!

What has happened this past week?

- Paved 2" of pavement on Featherstone Rd

Featherstone Rd by Hastings High School

What are the remaining items for the project?

- Apply additional top soil and apply compost seed to damaged turf located behind curb and pedestrian ramps.
- Apply traffic markings in same layout as existing conditions.
- Final Clean-up.

Note: The project is near complete! This will be the last construction update. Thank you for your patience with the project and enjoy the new roadway surface! The City respectfully asks residents to help keep their newly applied compost seed watered. Water will increase the success of the product especially during the coming hot summer months. Please know that a second application of compost seed will be applied to areas of need in September when the air temperature cools down a bit.

Questions or Concerns?

- Project management services are being provided by the City's Engineering Department. Please call the Assistant City Engineer at (651) 480-2369 with project related questions and concerns.
