

Central Water Treatment Plant Raw Watermain Project Construction Update #10 - 03/27/2026

What has happened during the past week?

- Crew located existing underground utilities along the proposed construction route.
- Workers started drilling a pilot hole for the initial section of watermain on the north side of North Frontage Road, stretching from Westview Drive to Lions Park.

What is scheduled for the week of March 30th?

- The pilot hole will be enlarged through a process known as reaming to accommodate the installation of the new watermain, which will then be pulled back through the bore hole.
- Upon completion of the pipe installation, the drill rig will be relocated to the intersection of State Street and 7th Street to initiate drilling for the final segment of the watermain, extending from State Street to Lions Park.

Important Notes

- Please refrain from parking on streets under construction from 7 AM to 7 PM.
- During construction hours (7 AM to 7 PM), access will be maintained but may be delayed.

Tips of the Week

- Please follow posted detour and warning signs.
- Reduce your speed and be cautious of uneven ground.
- Remain attentive—look out for signs, construction equipment, and workers.
- When near construction areas, establish eye contact with machine operators before moving forward.
- Remind children to avoid the construction site, machinery, and piles of materials.
- Access may vary throughout the day as work continues, so thank you for being patient.
