

2026 Mill & Overlay Program Update #6 – 6/12/26

What has happened this past week?

- Completed milling of the pavement.
- Began paving.

What is scheduled for next week?

- Re-grade steep edges adjacent to pedestrian ramps and backfill with top soil.
- Apply compost seed.
- Complete paving.
- Work on punchlist items

Right Photo: Paving Street

Notes

- 1) Contractor is actively trying to schedule application of compost seed. The City respectfully asks residents to help keep their newly applied compost seed watered. Water will increase the success of the product especially during the coming hot summer months. Please know that a second application of compost seed will be applied to areas of need in September when the air and soil temperatures cool down a bit.
- 2) Please continue to adhere to the “no parking” signs as paving operations continue. Please do not park on the street from 6am to dusk during these processes. Access to your driveway will continue however expect short delays while the operations pass through your street.

Questions or Concerns?

- Project management services are being provided by the City’s Engineering Department. Please call the Assistant City Engineer at (651) 480-2369 with project related questions and concerns.

Spread the Word & Encourage Updates!

- Please make sure to share this information with your neighbors and tenants. Feel free to encourage them to obtain a copy of the Construction Update if they have not already done so! Typically, new updates are posted on Friday.
